

Feline Polyradiculoneuritis

CASE STUDY – HBOT & VETERINARY MEDICINE

**Pre Hyperbaric Oxygen
Therapy 10/17**

**Post Hyperbaric Oxygen
Therapy 10/20**

Shadow

Hyperbaric Oxygen Therapy Dates:

October 17 – 1 treatment

October 18 – 2 treatments

October 19 – 2 treatments

October 20 – 1 treatment

This feline developed lower motor neuron tetraplegia one week after a vaccine. No ticks were found, and blood tests were unremarkable.

Polyradiculoneuritis was the working diagnosis. Rapid recovery resulted with HBOT treatment.
